

Future Year 7s...

We welcome you to Geography at HTC!

Geography is the study of earth. But we are lucky enough to be able to study many different elements, from volcanoes to people! Geography is a wonderful subject to open your eyes and inspire you. Once you are here at HTC you will learn about your surroundings first and then we will look into specific topics like Tectonics (One of our favourites!)

We have high expectations in Geography and we look forward to challenging you and stretching your minds!

In order to sink our teeth into the most exciting topics, we would like you to come to us in September prepared with the following knowledge:

You should know all 7 continents!

Correct spellings of all the continents

Know where the continents are on a world map

Be able to identify the 5 Oceans

Know the compass points!

BBC Bitesize KS3 Geography is a great site for some information, but just have a google and see what you can find!

Now for something our subject is famous for...Colouring in!

Follow the instructions carefully.

- Outline North America in red.
- Using green, shade in India
- Outline Africa in orange
- Shade Brazil in blue
- Outline Europe in pink
- Shade Italy in purple
- Put a star in the ocean closest to the UK
- Shade China orange
- Put a circle around the UK
